

PartumTM11 is a unique combination of phytochemical extracts and minerals that prevent post-partum complications i.e. Retention of placenta, Silent heat, repeat breeding, uterine infections with infertility and increases milk production.

BENEFITS:

- Reduces incidence of retained placenta and uterine infections
- Supports uterine involution
- Improves post-partum health
- Enhances milk quality and yield
- Regulates hormonal balance

INDICATIONS:

- Retention of placenta
- Silent heat
- Repeat breeding
- Uterine infections with infertility
- Delayed involution of uterus

RECOMMENDED USAGE:

To support uterine involution and release of lochial discharges-

After 5-7 days of delivery, supplement 100 ml oral daily for 5 days.

For early induction of estrus-

After 25-30 days of delivery, 100 ml oral daily for 5 days

or as advised by the qualified veterinary practitioner

**Packaging
500 ML**

CONCEPTION AND PARTURITION DENOTES GOOD REPRODUCTIVE HEALTH

Uterine Tonic

**Double Strength
Formulation
Enriched with
11 Herbs,
essential minerals
and Amino Acid**

MODE OF ACTION

REDUCES INCIDENCE OF RETAINED PLACENTA AND UTERINE INFECTIONS

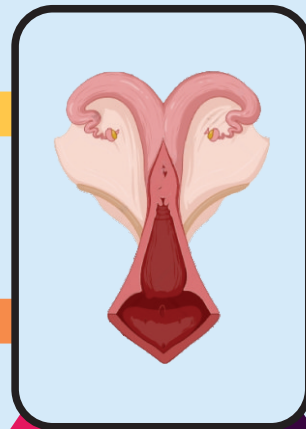

Saraca indica linn, Tribulus terrestris, Copper sulphate:
Improves oxytocic activity which help in uterus contraction and expel placenta that is fully detached. It reduces incidence of uterine infections and embryonic mortality.

SUPPORTS UTERINE INOVULATION

Saraca indica linn, Tribulus terrestris, Aloe barbadensis, Solanum Xanthocarpun, Copper sulphate:
Oxytocic effect in early post-partum accelerates uterine involution to resumption of the fertile ovarian cyclicity, increase lochial discharge to maintain normal size of uterus and increases conception rate .

IMPROVES POST-PARTUM HEALTH

Clerodendrum phlomidis, Solanum indicum, Solanum Xanthocarpun, Gmelina arborea, Ferrous sulphate, Copper sulphate, L-lysine:
Improves metabolism, regulates fat mobilization, bone strength, Immunity and reduces endometrial scar formation, leading to a better postpartum uterine health.

REGULATES HORMONAL BALANCE

Saraca indica linn, Clerodendrum phlomidis, Stereospermum suaveolens, Desmodium gangeticum, Ureria picta, Aegle marmelos, Solanum indicum, Tribulus terrestris, Aloe barbadensis, Copper sulphate:
Increases serum calcium which regulates GnRH-stimulated luteinizing hormone (LH) and follicle-stimulating hormone (FSH) secretion from pituitary gland under ovarian steroidogenesis. It improves fertility, increase ovulation and conception rate.

ENHANCES GALACTAGOGUE EFFECT

Stereospermum suaveolens, Gmelina arborea, Sodium tetra borate, Ferrous sulphate, L-lysine:
Galactagogue effect increases milk production and decreases serum triglycerides, low density lipoprotein concentrations during early lactation.

REDUCES OXIDATIVE STRESS

Desmodium gangeticum, Ureria picta, Solanum Xanthocarpun, Ferrous sulphate:
Maintains oxidative enzyme system, free radical scavenging ability and decreases cellular oxidative stress. It has uterine relaxant activity for the management of post-partum period to restore reproductive health.

COMPOSITION

Each 100 ml contains

Phytochemical extracts of:

Saraca indica linn.....	5 gm
Clerodendrum phlomidis.....	5 gm
Stereospermum suaveolens.....	5 gm
Desmodium gangeticum.....	5 gm
Ureria picta.....	5 gm
Aegle marmelos.....	5 gm
Solanum indicum.....	5 gm
Solanum xanthocarpum.....	5 gm
Gmelina arborea.....	5 gm
Tribulus terrestris.....	5 gm
Aloe barbadensis.....	2 gm

Enriched with-

Sodium tetraborate.....	640 mg
Ferrous sulphate.....	640 mg
Copper sulphate.....	320 mg
L-Lysine.....	500mg

Reduces Post-partum Complications - Improves Reproductive Health
